Subject: Fuel Supply Issue
Date: Friday, September 1, 2017 11:38:47 AM

I'm working with Weston (START) to provide fuel tank(s) and fuel to Addison, Houston, and Corpus. The current proposed locations are the Addison EPA warehouse, the Houston lab, and at a location to be provided by the team in Corpus (Eric Paisley). Currently, Weston is looking into gasoline and diesel tanks and supply for Addison and Houston, but gasoline only for Corpus as a diesel tank exists there already. Security will likely be necessary for the Houston lab at least until the lab is open/staffed next week (and possibly later depending on security concerns). As more information becomes available, I'll keep you in the loop. Please let me know if you have any concerns or issues.

Thanks

Paige Delgado
